

Author	Size	Length of Huffman	Reduction Ratio of Huffman
Alice	Full Size	263370	0.2436
Grimm	Full Size	564640	0.2473
Gulliver	Full Size	863135	0.2534
Holmes	Full Size	725339	0.2491
Pride	Full Size	660427	0.2511
TomSawyer	Full Size	863135	0.2534
Ulysses	Full Size	792873	0.2484

Length of Huffman

Reduction Ratio of Huffman

I was unable to figure out how to divide up the texts into fragments, so these are the statistics for the full size of the text, divided by author.

You can see that Tom Sawyer and Gulliver both have the same highest Reduction Ratio from the Huffman encoding, with a value of .2534. I could not have predicted this information, as I do not know enough about each writer's style to form a hypothesis.
